¹No dicamba herbicide is currently approved for in-crop use. Xtendimax[™] Herbicide with VaporGrip[™] Technology and Roundup Xtend[™] Herbicide with VaporGrip[™] Technology are not currently available for commercial use or sale.

²Herbicide qualifier applicable ONLY if in-crop use of dicamba is approved by the EPA. If EPA approval is not granted for in-crop use of dicamba products, higher incentive amounts will be honored on Roundup Ready 2 Xtend soybeans.

2017 Roundup Ready PLUS[®] Platform

As of this printing no dicamba herbicide product has been approved for commercial in-crop use with Roundup Ready 2 Xtend[®] soybeans, DO NOT APPLY DICAMBA HERBICIDE IN-CROP TO ROUNDUP READY 2 XTEND[®] SOYBEANS IN 2016 unless you use a dicamba herbicide product that is specifically labeled for that use in the location where you intend to make the application. While no in-crop use of dicamba is currently approved, some dicamba products may be labeled for weed control prior to planting a crop and subject to minimum plant back restrictions. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE AN IN-CROP APPLICATION OF ANY DICAMBA HERBICIDE PRODUCT ON ROUNDUP READY 2 XTEND[®] SOYBEANS OR ANY OTHER PESTICIDE APPLICATION, UNLESS THE PRODUCT LABEL SPECIFICALLY AUTHORIZES THE USE. Contact the U.S. EPA or your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for IN-CROP USE WITH Roundup Ready 2 Xtend[®] soybeans and follow all pesticide product labeling.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup[®] brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate. Hero[®] Insecticide is restricted use pesticide and is not registered in all states. The distribution, sale, or use of an unregistered pesticide is a violation of federal and/or state law and is strictly prohibited.
